

# Pandemic Influenza Preparedness (PIP) Framework

Sharing of influenza viruses &  
access to vaccines and other benefits

## Introduction to the World Health Assembly A Briefing for Delegates

**Geneva Graduate Institute**

20 May 2018

**World Health  
Organization**

# PIP Framework - Access to Vaccines

---

## → PIP Framework objectives:

- Rapid, systematic and timely sharing of ***influenza viruses with pandemic potential*** with Global Influenza Surveillance and Response System
- ***Fair and equitable access to vaccines*** and other pandemic response products by countries in need

**>400M doses**  
of vaccines

**10 million**  
treatment courses  
of antivirals

**250,000**  
diagnostic kits

# WHA 71 & PIP Framework

---

- PIP 2016 Review Report: Contains important reflections on Framework scope in light of 2 developments:
  - Increasing use of GSD for vaccine/other product development
  - Entry into force of Nagoya Protocol
  
- Review Group (RG) recommends an Analysis:
  - Should scope of PIP Framework be expanded ***or not*** to include: Seasonal viruses? GSD in definition of PIP Biological Materials?
  
- WHA 70(10) requests DG to, *inter alia*, analyse issues from RG questions, report to WHA71, and to make recommendations on further action.

# A71/24 - Report on progress

---

- A71/24 provides details on each request in A70(10) and a draft decision (para 20).
- Draft decision proposes:
  - Full implementation of Review recommendations that fall within Secretariat mandate by WHA72;
  - Submission of comprehensive Analysis **draft** to WHA72 thru EB144.
    - **Submission of final** Analysis to WHA73 thru EB146 (unless WHA 72 deems comprehensive draft to be sufficient)
  - Implementation of Partnership Contribution Plan 2018–2023
  - Continued work to conclude SMTA2s
  - Continued engagement with CBD Secretariat and other IOs
  - Implementation of external auditor recommendations
  - Report to WHA72 through EB144.

# What is at stake

---

- A71/24 Report, proposals for future actions and draft decision are straightforward.
- Subject matter of Analysis has implications which will be considered by **WHA 72**
  - Analysis will address opportunities and challenges of pursuing or not pursuing changes to the scope of the Framework
  - Analysis will reflect broad input from Member States and relevant stakeholders, notably PIP Advisory Group and GISRS.
