THE NEW BARBARIANISM

FILM SCREENING & DISCUSSION

Wednesday, 13 June, 18:00-20:30
Maison de la paix, Auditorium Ivan Pictet

Medical and humanitarian workers are increasingly targeted in modern wars. So far, there has been little to stop the profound surge of violence seen across several open-ended conflicts which has claimed thousands of lives, destroyed health systems, triggered mass displacement and state collapse, and exposed the crisis facing the norms of international humanitarian law contained in the Geneva Conventions.

The New Barbarianism is a documentary that examines the crisis, its causes, the limited international response and possible ways forward through dozens of interviews and original footage obtained from inside Syria, Yemen and Afghanistan.
