BACKGROUND AND MISSION

City Cancer Challenge is a city-based partnership initiative that aims to improve access to quality cancer care in countries around the world by transforming the way stakeholders, from the public and private sectors, collectively design, plan, and implement cancer solutions.

The approach is built on the core principle that cities can drive impact at national level by crafting data-driven solutions with the support of a network of global, regional, and local partners that reflect an understanding of the unique local context.

AREAS OF INTEREST

- Cancer
- Cancer care
- Non-communicable diseases
