

MASTER IN INTERNATIONAL AFFAIRS
SPECIALISATION TRACK

TRADE AND INTERNATIONAL FINANCE

THE
GRADUATE
INSTITUTE
GENEVA

INTERDISCIPLINARY
MASTERS

The Trade and International Finance track introduces students to core issues in international economic integration. Students can choose between two required core courses in this specialisation: one on Globalisation or one on International Finance.

The first required course looks at how globalisation and its conceptualisation have changed over the past two centuries and how it is likely to change going forward. The second required course covers some of the principles and key topics in international finance.

Drawing on the disciplines of the Graduate Institute and the expertise of experienced policymakers, a range of electives courses will provide other perspectives on international economic integration, in particular from history and anthropology. The courses will also cover specialised topics such as competition and industrial policy, internet governance, international standard setting and the global governance of intellectual property rights. Through case-based teaching and the opportunity to develop a capstone project, students will be challenged by concrete problems.

CORE COURSES

- Globalisation | **Richard Baldwin**
- International Finance and Financial Crises | **Beatrice Weder Di Mauro**
