Master in Anthropology and Sociology

The Master in Anthropology and Sociology is a programme designed for students interested in the comparative study of global issues across national borders and beyond the opposition between centre and periphery. It examines in a critical way international relations and development with the goal of questioning totalising views of globalisation and the conventional North-South divide. Courses in the programme engage with theoretical approaches and methodological tools in anthropology and sociology in order to enable students to explore several key themes: development; the state and international governance; violence and conflict; rural-urban relations; migration; global health and biomedicine; law, market and labour; inequality; gender; environment; the politics of images.

Each student is allowed to spread out the elective courses over semesters 1 to 4, but must take into account the following points:

- Students must take a certain number of courses in their discipline of specialisation and in complementary disciplines;
- It is obligatory for students to obtain a minimum of 18 ECTS credits each semester;
- Failed courses cannot be repeated during the fourth semester of studies.

The Department of Anthropology and Sociology offers a fast-track entry to our doctoral programme on an exceptional basis. A student may be considered for a fast-track position if he or she has substantial prior training in Anthropology and/or Sociology (for instance, a BA in either discipline) and has demonstrated excellence in our master’s programme. In general, we encourage students to follow our full MA programme of coursework and training before applying to the doctoral programme. We are convinced that this allows them to profit most from our unique approach to the major global issues of our time and to carry out their own empirical research based on the solid theoretical and methodological training that we offer as a Department.

Students have the opportunity to spend their third semester at one of the Institute’s partner universities as part of an exchange programme.

Minor in Anthropology and Sociology

Students who are enrolled in a PhD programme in another department and wish to obtain a minor in Anthropology and Sociology must fulfil the following requirements:

- Submit their application file to the ANSO Head of Department;
- Have a PhD co-supervisor from the teaching faculty of the Department of Anthropology and Sociology;
- Complete 18 course credits including the compulsory Doctoral Research Seminar I: Themes and Debates. The Doctoral Research Seminar II: Critical Epistemologies may be taken as one of the electives.
Master in International Economics

The Master in International Economics combines a focus on economics with the Institute's multidisciplinary teaching in other key subjects to give students a broad view of economic policy. Courses cover trade, development, econometrics, macroeconomics, financial crises, monetary and financial systems, natural resource economics, climate change, regional integration, migration, economic history and more.

Each student is allowed to spread out the elective courses over semesters 1 to 4, but must take into account the following regulations:

- Students must take a certain number of courses in their discipline of specialisation and in complementary disciplines;
- It is obligatory for students to obtain a minimum of 18 ECTS credits each semester;
- Failed courses cannot be repeated during the fourth semester of studies.

At the end of the first semester, the student chooses between one of the following tracks:

- International Finance and Macroeconomics
- International Trade
- Development Economics
- Sustainable Finance and Development

A trackless master programme is possible if approved by the Head of Department. The student must take 8 compulsory courses: 6 from the core curriculum and 2 to be chosen among the compulsory courses corresponding to the tracks.

Students interested in the fast-track option must obtain the 90 course credits required by the curriculum by the end of the third semester. In the third semester, students should refer to the PhD curriculum and take the following courses:

- Advanced International Trade A (2 courses 3 ECTS each) for the PhD in International Economics with a specialisation in International Trade
- Advanced International Macroeconomics A (2 courses 3 ECTS each) or the PhD in International Economics with a specialisation in International Macroeconomics
- Advanced Development Macroeconomics (2 courses 3 ECTS each) for the PhD in Development Economics
Students can spend their third semester at one of the Institute’s partner universities as part of an exchange programme.

It is strongly recommended that all students follow the Department seminar each year:

→ Vilfredo Pareto Doctoral Research Seminar - Department Seminar Series

Note: Courses numbered I and II must be taken in sequence. The courses with an A and B designation are independent.

PhD in Development Economics

The PhD programme in Development Economics provides state-of-the-art training for economists who wish to focus on developing countries. Two compulsory doctoral seminars, one on development microeconomics, the other on development macroeconomics, ensure that students are both rigorously trained and well-rounded. A compulsory advanced econometrics class, coupled with an elective in impact evaluation, guarantees that students possess the empirical skills needed to conduct original research.

International History and Politics

Master in International History and Politics

The Master Programme in International History and Politics researches and teaches the contemporary world through its different histories and politics. Within layered, critical and global outlooks, International History and Politics are studied before, between and beyond nations, thereby encouraging multifaceted approaches to current policy, socioeconomics, politics and culture.

The main teaching and research themes of the Master Programme in International History and Politics are:

- The history and politics of international governance and systems;
- The history and politics of transnational actors and actions; and
- The history and politics of culture, societies and markets in regional and/or global perspective.

These themes are complementary. The Department’s mission is to encourage dynamic and cross-cutting historical approaches to understanding, contextualising and situating international politics and policies. Specifically, the Department cultivates methodological richness in international, transnational, global, social, economic and cultural history and politics.

The International History and Politics Forum (IHF) is a regular series of discussions convened by the International History and Politics Department at the Graduate Institute of International and Development Studies to discuss a variety of global questions from a multiplicity of historically-informed perspectives.

The IHF takes place every other Tuesday from 16:15 to 18:00 in Room A2 at the Graduate Institute (Maison de la paix) during the autumn and spring academic semesters.

Attendance is required for all Master’s students.
Each student is allowed to spread out the elective courses over semesters 1 to 4, but must take into account the following regulations:

- Students must take a certain number of courses in their discipline of specialisation and in complementary disciplines;
- It is obligatory for students to obtain a minimum of 18 ECTS credits each semester;
- Failed courses cannot be repeated during the fourth semester of studies.

Students interested in the fast-track option must obtain the 90 course credits required by the curriculum by the end of the third semester. During the third semester, these students must take in advance “Doctoral Seminar I”, which is supposed to be taken in the first semester of the PhD programme; this course would replace an elective course offered in the master curriculum.

Students have the opportunity to spend the third semester at one of the Institute’s partner universities as part of an exchange programme.

INTERNATIONAL LAW

Master in International Law

The Master in International Law provides students with the skills and knowledge necessary for rigorous analysis of contemporary international legal issues. It couples a solid background in the main areas of international law (international law-making, international dispute settlement, history and philosophy of law) with advanced training in one or more specialised fields (including trade and investment, human rights, environment, migration, territorial disputes and international law theory).

Each student is allowed to spread out the elective courses over semesters 1 to 4, but must take into account the following regulations:

- Students must take a certain number of courses in their discipline of specialisation and in complementary disciplines;
- It is obligatory for students to obtain a minimum of 18 ECTS credits each semester;
- Failed courses cannot be repeated during the fourth semester of studies.

Students interested in the fast-track option must obtain the 90 course credits required by the curriculum by the end of the third semester. During the third semester, these students can also take in advance 6 ECTS credits from the 18 ECTS credits of elective courses specified in the PhD curriculum; this course will replace an elective course offered in the master curriculum.

Students have the opportunity to spend the third semester at one of the Institute’s partner universities as part of an exchange programme.
