

Climate Fresk is an international NGO on a mission to **raise awareness about climate change**. Our workshops are a **fun and collaborative** way to learn the science behind the IPCC<sup>1</sup> reports.

## Understanding climate change empowers us to act

Faced with the climate emergency, we believe that everyone needs to understand the basics of climate science. This knowledge will enable us to embrace the structural changes we need to make, and start taking effective action.

## The statistics

**450,000+** Participants in our workshops

**20,000+** Facilitators

**80** International coordinators

**50** Countries and **40** languages

## In their words...

*"Climate Fresk is an innovative, efficient and accessible tool for understanding the scientific foundations of climate change. Spreading this knowledge far and wide is essential so that each and every one of us can act at the necessary speed and scale."*

**Valérie Masson-Delmotte**, Co Chair - Working Group 1 - IPCC

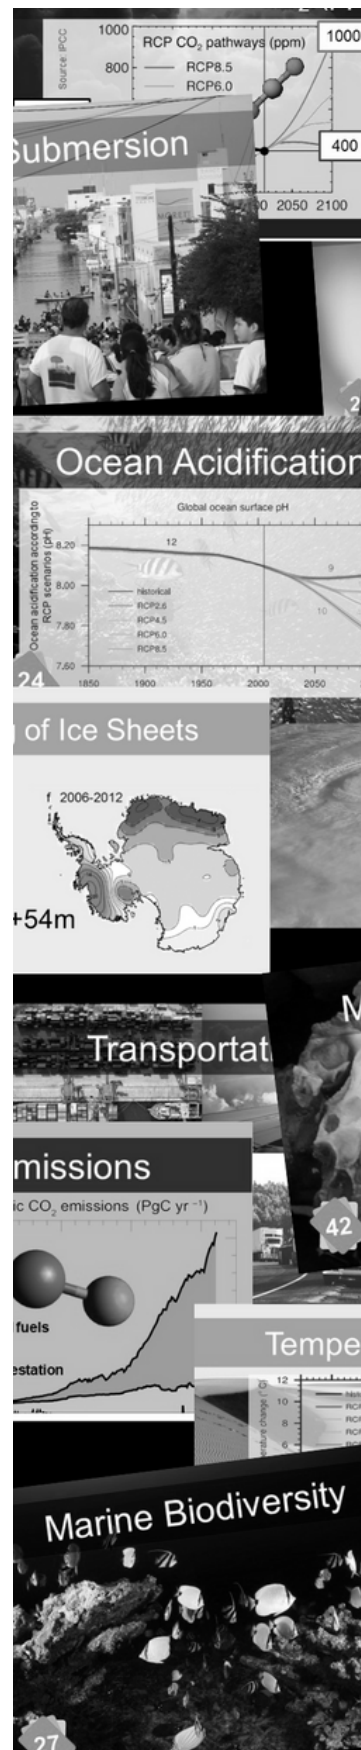

*"This massive amplification of the use of Climate Fresk will allow us to prove ourselves tomorrow to our customers, schools, territories and all our stakeholders..."*

**Carine de Boissezon**, Chief Sustainability Officer - EDF

*"How does climate change work? To know the answer, your first option is to read the IPCC report. Guaranteed result, but there are 2000 pages to get through. Your second option: play Climate Fresk. The game enables you to understand the mechanics of this eminently complex subject. Try it and you'll see!"*

**Jean-Marc Jancovici**, Member of the **French High Council for Climate**

<sup>1</sup> Intergovernmental Panel on Climate Change

# THE WORKSHOP

## It's simple

Participants gather around a table in teams of 4 to 7. They work collaboratively, using the Climate Fresk cards, to learn about the cause and effect relationship between different components of climate change. A trained facilitator guides the entire process and provides additional insight.

1 card game

4 -7 players

1 facilitator

3 hours

Pens, paper and a table

## The 4 stages of the workshop

**1 1h30 - BUILD** : Discover and link the cards to create the Fresk.

**2 30' - CREATE** : Take ownership of the Fresk by adding illustrations and a title.

**3 10' - PRESENT** : Deliver a concise presentation to consolidate your knowledge.

**4 50' - DEBRIEF** : Share with other players your feelings, opinions, questions and solutions.

## Take part in a workshop

Beginners will learn the basics of climate science and more experienced participants will build on and structure their existing knowledge. We also offer dedicated workshops to fit your requirements with bespoke support.

## Our other tools

The Climate Fresk workshop is accessible to anyone. There is a simplified version for adults and a Junior version for children aged 10-14.
