- Internship (optional)  
  3 ECTS  
  = 30 ECTS

MASTER THESIS

= 30 ECTS
To complete the MINT programme, students must fulfil a total of 120 ECTS credits in accordance with the General Curriculum Outline.

Students are required to:

| Programme Foundations | → Follow the compulsory core courses *Global Issues and Perspectives I* in the first semester and *Global Issues and Perspectives II* in the second semester.  
|                      | → Follow the compulsory course on *Statistical Literacy* in the first semester and obtain 12 credits of research methods electives which can be taken during any of the four semesters of the programme. Students who receive a course waiver for the statistics class must complete an additional 6 credits of research methods elective.  
| Specialisation        | → Follow the compulsory course in the assigned specialisation in the first semester and obtain 24 credits of specialisation electives during any of the four semesters of the programme. Students may select courses from a list of cross-specialisation electives, but they must complete at least 12 credits from the list of courses specific to their specialisation.  
| Applied Research And Practice | → Participate in the *Applied Research Foundations* orientation workshop at the start of the second semester for 3 credits (graded pass or fail), complete an Applied Research Project (ARP) for 9 credits in the second semester and present the project by the end of the third semester for 3 credits.  
|                      | → Obtain 12 credits of skills workshops during any of the four semesters of the programme. If students register for a workshop but fail to participate without a valid excuse (e.g. documented medical emergency), they will automatically receive an N code on their transcript (unjustified withdrawal).  
|                      | → Students enrolled in the French course will receive 3 credits if they pass the evaluation. These 3 credits will replace one skills workshop.  
|                      | → Optional: validate an internship for 3 credits. If students do not validate an internship, they are required to take an extra 3 credits of skills workshops, for a total of 15 credits.  
| Master Thesis        | → Produce a thesis for 30 credits of original research between 15,000 and 25,000 words.  

Students are advised to complete an average of 30 ECTS per semester and can spread out electives courses over the 4 semesters of the programme, but they must take into account the following regulations:

- Students must complete the compulsory components as specified in the General Curriculum Outline and summarised in the table below.
- It is obligatory for students to obtain a minimum of 18 ECTS credits per semester.

Students can spend their third semester at one of the Institute’s partner universities as part of an exchange programme.

Students can request to take courses as electives relevant to their studies in another university. This shall however not exceed 12 ECTS credits and must be approved by the Office of the Director of Studies.

Additional information can be found in the Academic Regulations and the Implementation Guidelines for Master programmes which are available on the Graduate Institute website.

CROSS-SPECIALISATION ELECTIVE COURSES

As part of the 30 ECTS of specialisation courses required to complete the programme, MINT students may select courses from the following list of cross-specialisation elective courses covering a wide range of topics. The objective of these electives is to allow students to explore themes beyond their specialisation. They must however ensure that they complete at least 12 ECTS from the list of courses specific to the specialisation. Some of the courses listed below have been flagged by the heads of specialisation to count as part of their specialisation electives. Students who are following these courses as part of their specialisation will have priority during registration.

Disciplinary programmes elective courses open to MINT students

Please consult Pocket Campus (available on your smartphone and on the website) for all courses from other disciplines open to MINT students.
APPLIED RESEARCH AND PRACTICE

Applied Research is a foundational part of the MINT programme, a key learning experience through which students grapple with the key questions and issues relevant to international policy and practice. Through the Applied Research Projects (ARPs), students learn and apply analytical and research skills to practical and policy-relevant issues in international relations and development.

APPLIED RESEARCH FOUNDATIONS

At the beginning of the second semester, students participate in a 3 ECTS intensive Applied Research Foundations orientation workshop. This mandatory, in-person workshop provides an overall conceptual framing to the ARPs so that students understand the importance of applied research and the key learning objectives of the overall applied research process. Students are introduced to the design of applied research frameworks, project management and the basic elements of applied research ethics. Group work and conflict management exercises during the workshop support early teambuilding.

APPLIED RESEARCH PROJECT (ARP)

Through an iterative selection process which considers student preferences and skill sets, ARP groups are assigned at the beginning of the second semester. Throughout the semester, students work with autonomy and professionalism under the supervision of a team of Graduate Institute faculty and tutors to find answers to the research questions set by the partner organisation. ARPs are worth 12 ECTS in the second semester, and students are expected to allocate significant time and energy to ensure the successful project collaboration. Over the project period, students will elaborate a project Terms of Reference, conduct in-depth literature reviews, learn to frame appropriate research questions and design methodologies, undertake original research, analyse data, and write analytic inception, preliminary and final reports. In addition to gaining deep knowledge around the research question, students will deepen their skills in teamwork, professionalism, effective communication, and problem-solving.

ARP PRESENTATION

A final presentation is held once the final ARP output is completed and before the end of the third semester. Worth 3 ECTS, the format and audience for the final presentation is decided with the ARP partner organisation. In some cases, the final presentation will be for a restricted audience to guide internal strategy for an organisation, while in other cases, it may be held for a wider public in order to disseminate research findings and recommendations. The presentations are expected to strengthen students’ presentation and public speaking skills and to support broader professional networking possibilities.

MASTER THESIS

The Master thesis is the culmination of the two-year MINT programme. It is a piece of independent writing carried out by Master students under faculty supervision. The thesis is worth 30 ECTS. Students will need to present an original research question addressing an issue relevant to international affairs and/or international development. Students may choose a supervisor among any of the Graduate Institute’s faculty members affiliated to their specialisation.

Detailed guidelines on the thesis can be found in the Student Toolbox, accessible through the intranet.
