ANTHROPOLOGY AND SOCIOLOGY

Master in Anthropology and Sociology

The Master in Anthropology and Sociology is a programme designed for students interested in the comparative study of global issues across national borders and beyond the opposition between centre and periphery. It examines in a critical way international relations and development with the goal of questioning totalising views of globalisation and the conventional North-South divide. Courses in the programme engage with theoretical approaches and methodological tools in anthropology and sociology in order to enable students to explore several key themes: development; the state and international governance; violence and conflict; rural-urban relations; migration; global health and biomedicine; law, market and labour; inequality; gender; environment; the politics of images.

GENERAL CURRICULUM OUTLINE

4 compulsory courses	4 x 6 = 24 ECTS
11 elective courses <ul style="list-style-type: none">• 7 to 9 courses in the discipline of specialisation (including 2 recommended elective courses)• 2 to 4 courses in one or several complementary discipline(s)	11 x 6 = 66 ECTS 42 to 54 ECTS 12 to 24 ECTS
Master dissertation	30 ECTS
TOTAL	90 + 30 = 120 ECTS

Each student is allowed to spread out the elective courses over semesters 1 to 4, but must take into account the following points:

- Students must take a certain number of courses in their discipline of specialisation and in complementary disciplines; the French course will count as a complementary course (3 ECTS) that students have to take outside the discipline (*incoming students from September 2022*).
- It is obligatory for students to obtain a minimum of 18 ECTS credits each semester;
- Failed courses cannot be repeated during the fourth semester of studies.

The Department of Anthropology and Sociology (ANSO) does not offer a fast-track entry to its doctoral programme. The Department encourages students to follow the full MA programme of coursework and training before applying to the doctoral programme. The ANSO Faculty are convinced that this allows students to profit most from ANSO's unique approach to the major global issues of our time and to carry out their own empirical research based on the solid theoretical and methodological training that is offered at the Department.

Students have the opportunity to spend their third semester at one of the Institute's partner universities as part of an exchange programme. **There is also the possibility to obtain 3 ECTS credits for an internship during the MA programme.**

INTERNATIONAL ECONOMICS

Master in International Economics

The Master in International Economics combines a rigorous training in the advanced empirical and analytical tools that are required for careers in international economics with a policy orientation. It provides students with the necessary work-skills, and the institutional and historical background they will need to apply the tools to real world problems.

INTERNATIONAL HISTORY AND POLITICS

Master in International History and Politics

The Master Programme in International History and Politics researches and teaches the contemporary world through its different histories and politics. Within layered, critical and global outlooks, International History and Politics are studied before, between and beyond nations, thereby encouraging multifaceted approaches to current policy, socioeconomics, politics and culture.

The main teaching and research themes of the Master Programme in International History and Politics are:

- The history and politics of international governance and systems;
- The history and politics of national and transnational actors; and
- The history and politics of culture, societies and markets in regional and/or global perspective.

These themes are complementary. The Department's mission is to encourage *dynamic and cross-cutting historical approaches* to understanding, contextualising and situating international politics and policies. Specifically, the Department cultivates *methodological richness* in international, transnational, global, social, economic and cultural history and politics.

INTERNATIONAL LAW

Master in International Law

The Master in International Law provides students with the skills and knowledge necessary for rigorous analysis of contemporary international legal issues. It couples a solid background in the main areas of international law (international law-making, international dispute settlement, history and philosophy of law) with advanced training in one or more specialised fields (including trade and investment, human rights, environment, migration, territorial disputes and international law theory).
